

**CWP®**  
**Coloured Wood Products**

## **DYNAMIC LIGHT RESPONSE**

**COLOUR YOUR WORLD ECOLOGICALLY**

## Environmentally friendly veneers

CWP specializes in the through-dyeing of wood using environmentally friendly processes (no bleaching). We offer reconstituted 0,6 mm Birch Veneers in beautiful natural colour tones.

The veneer surface reflects light in an unparalleled way. This Dynamic Light Response is created because we use thicker dyed veneers than is standard, which gives each layer unique characteristics that create contrast with every other layer. With CWP veneers you can create relaxed, soulful designs.

All our wood is sourced from sustainably managed forests with **FSC-certificate**. The **dyes are water-based** containing no harmful substances. CWP veneers are **EN 717-1 standard-compliant**.

All our veneers are also available as **CWP® Veneer Laminates**, where our real veneer becomes a durable high pressure laminate.

## End use areas

CWP veneer can be used anywhere in the same way than traditional veneers are used.

**Furniture & Fittings**

**Interior walls and doors**

**Edgings**

**Formpressing**

**Automotive & Maritime Industries**

## Veneer Size

Thickness 0,6 mm (+/- 0,03mm)  
Length 2600 - 2690 mm  
Width 500 - 590 mm

Fixed measurements for each lot.  
Other sizes available by agreement.
